

Topic name: Human Heart Date: 04.01.2026

Class: F. Y. B. Sc. Year: 2025

Faculty name: Dr. B.V. Pathare

Topic context A short overview of the Topic’s purpose and its end objectives	
Purpose	To explainhuman heart
objectives	- Identify the location of the human heart in the body. Describe the structure of the human heart. Name the four chambers of the heart. Explain the function of the heart in blood circulation. - Draw and label a simple diagram of the human heart
Learning descriptions An insight into the learners and learning environments	
Foundations of Science	Foundations of Science
Learning environment	Physical Classroom
Design specifications	
Performance goals	To train the learners to take projects on Water waste management and help in reducing water pollution
Learning outcomes	Understand the basic structure and function of the human heart. Be able to identify and label heart parts. Explain how the heart helps in blood circulation.
Delivery methods	- Chart or diagram of the human heart - PowerPoint presentation / board diagrams - Short animation/video of heart pumping - Worksheet for labeling heart parts
Assessment type	Oral questions during class. Worksheet: Label the parts of the heart. Short quiz: How many chambers does the heart have? What is the function of the heart?
Assessment level	BL3
